ABOUT ME

Motivated Software Developer with 3 years of work experience. Throughout these years I developed full-stack web applications for multiple companies, worked on enterprise payroll systems, and I learned the ins and outs of working in bigger teams and with international branches.

LANGUAGES

English - C1 Certificate

TECHNICAL SKILLS

- Proficient knowledge of web development technologies
- Comfortable with C++, Java, Python, Go, Rust, TypeScript
- Usage and configuration of Unix based systems

PROJECTS

At ELTE I got to work with all types of languages and I had multiple classes that were focused around working in teams and development practices. As my final project I made a tech forum which uses Docker, Golang and React. At MoonLabs I developed websites for all types of bigger and smaller companies. While working at Oracle I wrote and maintained automation scripts in python for employee management. Later I developed a server and frontend for remote script execution for these automations. I also participated in an international project where I used Oracles PL/SQL like fast formula language to make calculation formulas.
